

# Washington Poison Center

## 2017 Annual Toxic Trend Report: Nicotine and E-Cigarette

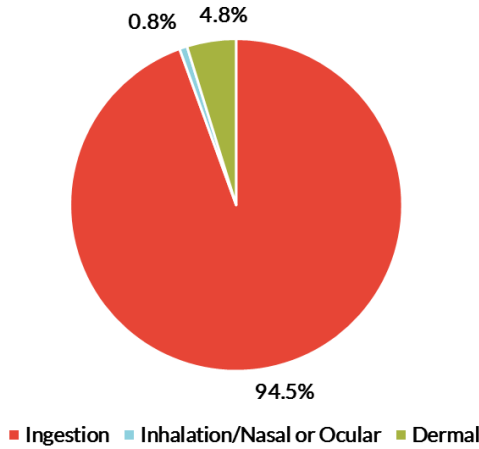

### Nicotine Exposures 2011-2017

### Type of Nicotine

### How are children (0-12 yrs) exposed?

### Nicotine Exposures By Age from 2014-2017

Top symptoms seen in 0-12 years exposed to nicotine in 2017 are vomiting, coughing/choking, drowsiness/lethargy, and pallor.

### Nicotine Clinical Effects in 2017

98.7% of patients who called the poison center first were managed by our Specialists at home, keeping them out of the emergency department, saving \$296,990 of our patients' dollars.

\*Disclaimer: Reporting of exposures to the Poison Center is voluntary and not mandated by law. As such, WAPC data describes the number of exposures reported to the Poison Center and most likely is an underrepresentation of the true occurrence of any one substance. All calls to the WAPC are free and confidential. For further information, contact Arti Patel at [apatel@wapc.org](mailto:apatel@wapc.org) or 206-517-2380
