POISON PATROL

Coloring and Activity Book

by Elizabeth Keating

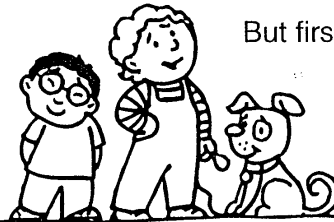

©1998 Children's Hospital of Pittsburgh

Poisons are everywhere.
They have many shapes,
colors, and smells.

Let's look around Deidre's house.
I think we can find lots of things that
can be poisonous if used improperly,
some in safe places, some not.

But first ...

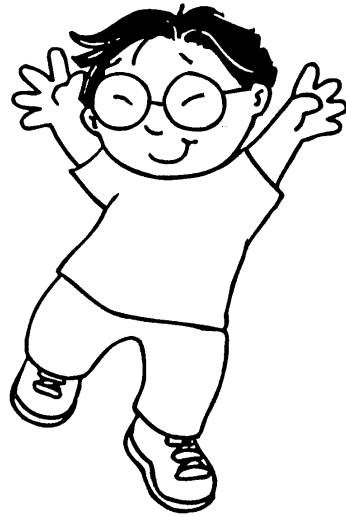

... let's meet Deidre and her friends.

They are the Poison Patrol Team!

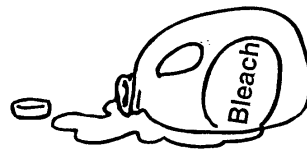

Deidre is in charge of finding the sprays ...

like bug spray.

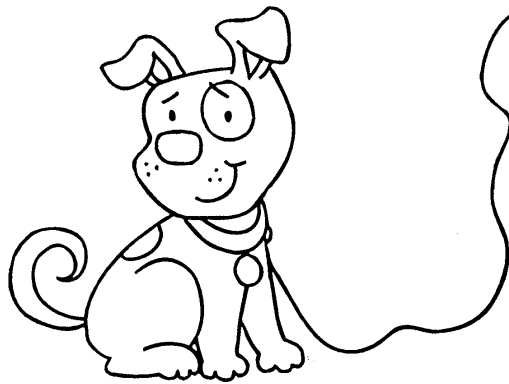

Jason will locate the liquids ...

like bleach.

They are really good at finding things that can be harmful and telling other kids to STAY AWAY from these dangerous substances.

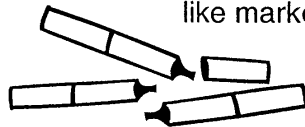

and Chris will find the solids ...

Max sniffs out the invisibles ...

like smoke.

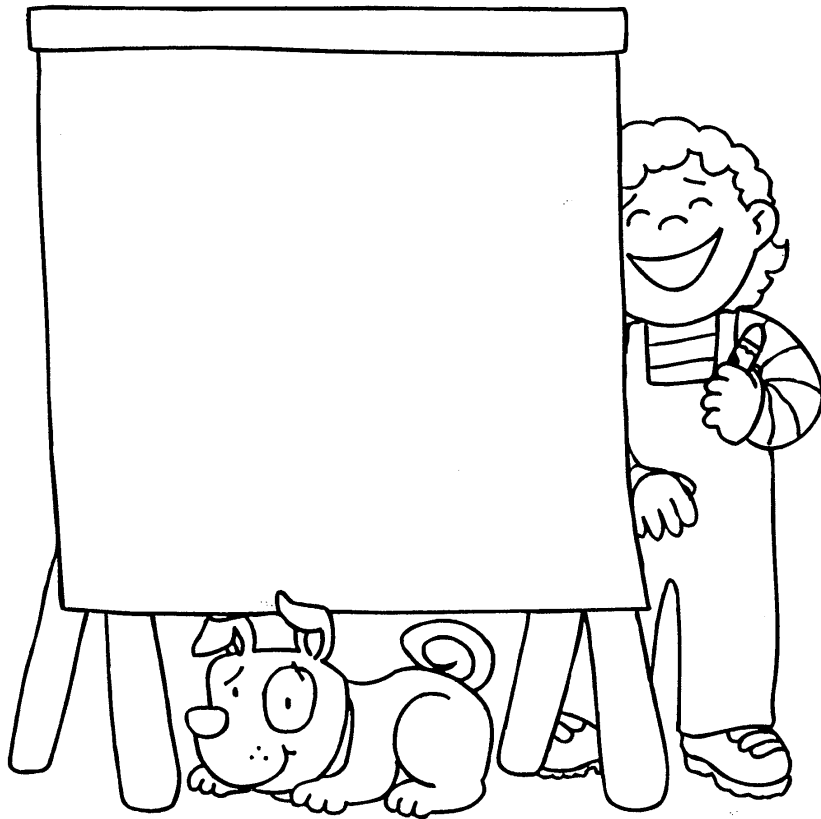

like markers.

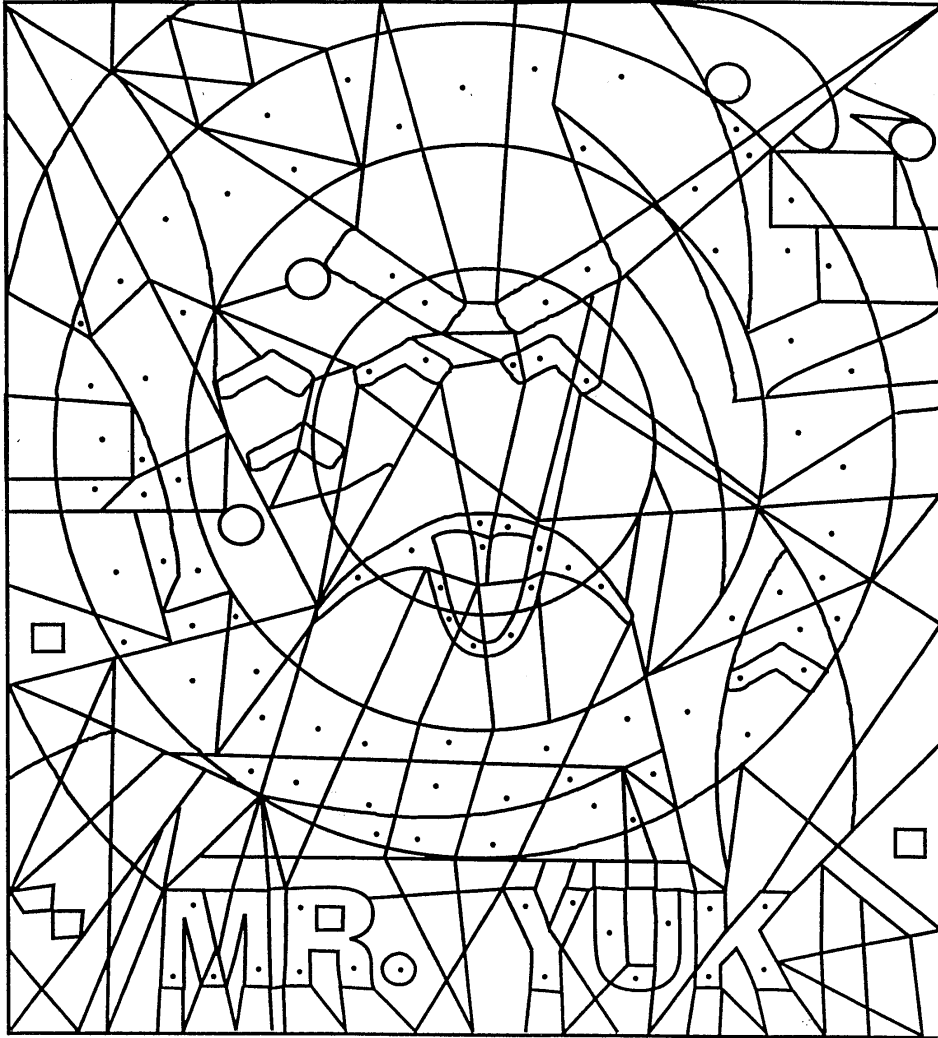

Do you know something that is a poison?

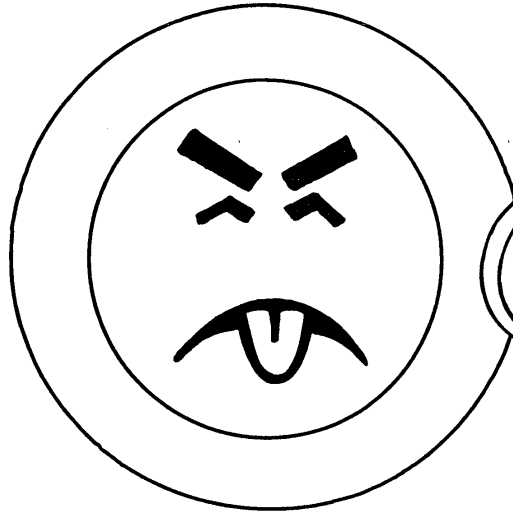

Draw it here:

Color all of the shapes with a dot in them.

You can put this face on all of the poisons in your home to remind yourself and other kids "DO NOT TOUCH!" "STAY AWAY!"

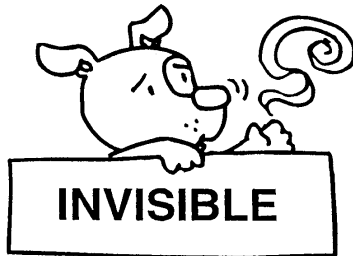

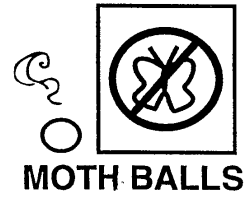

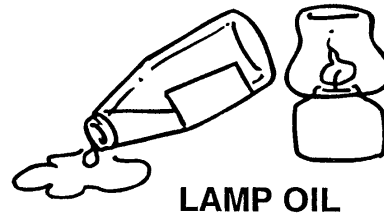

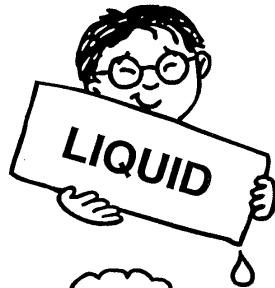

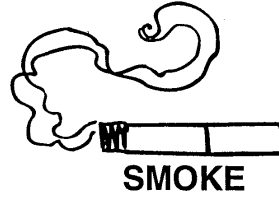

Jason knows that MR. YUK tells kids :

"XPXNXO!XXSPTXAYXPXX
PXPXAXWAPY!XPXXDXOX
XNXOXTXPXTPOUXCPH!P
XPXDPANXGXEPR!XXPXP"

Cross out all of the Xs and Ps so you can read the secret message about poisons from MR. YUK!

Draw a line from the form of poison on the left to the poisonous object on the right.

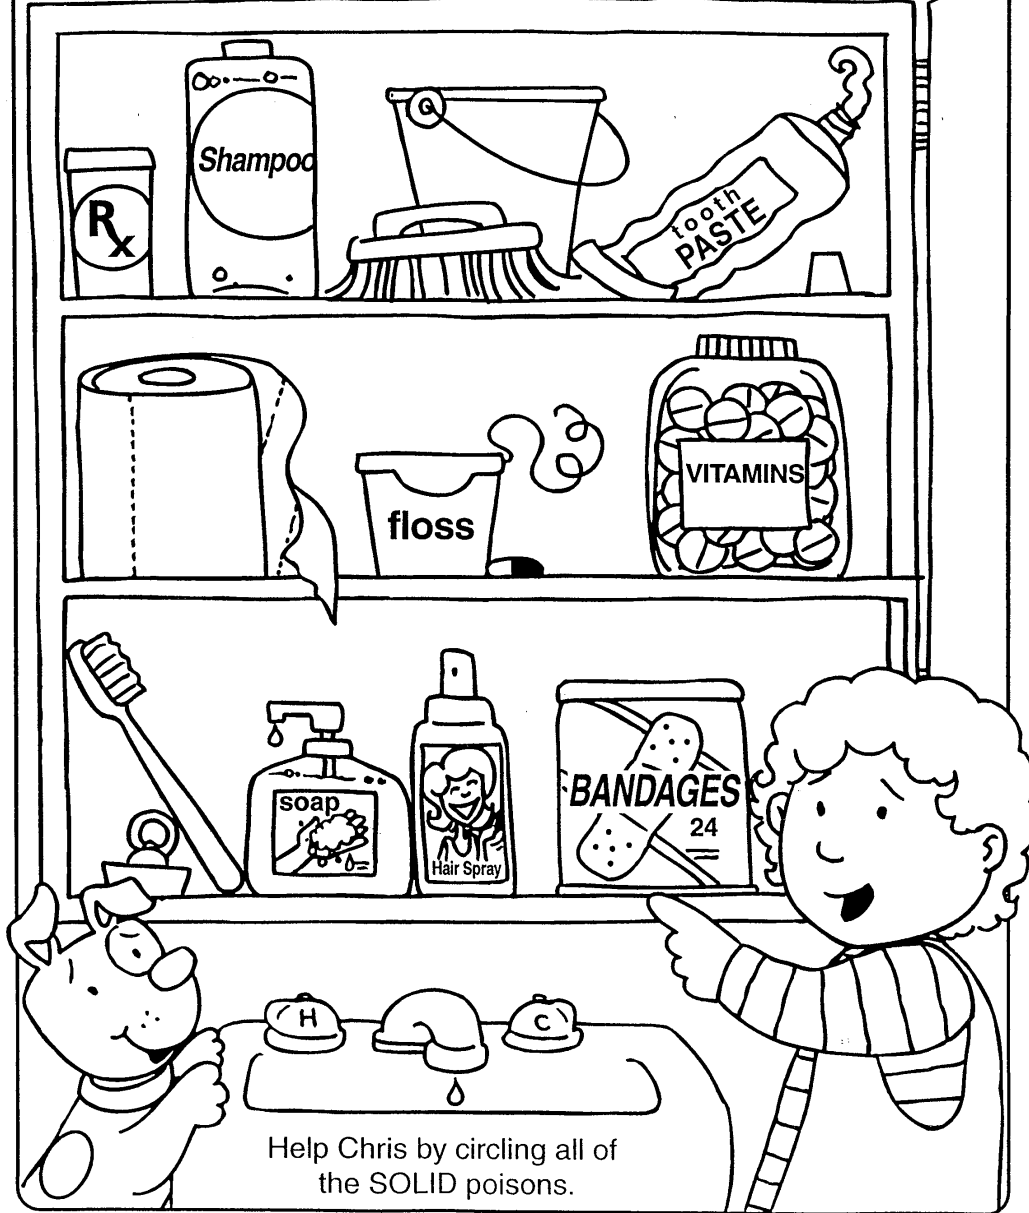

Poisons can be anywhere ...

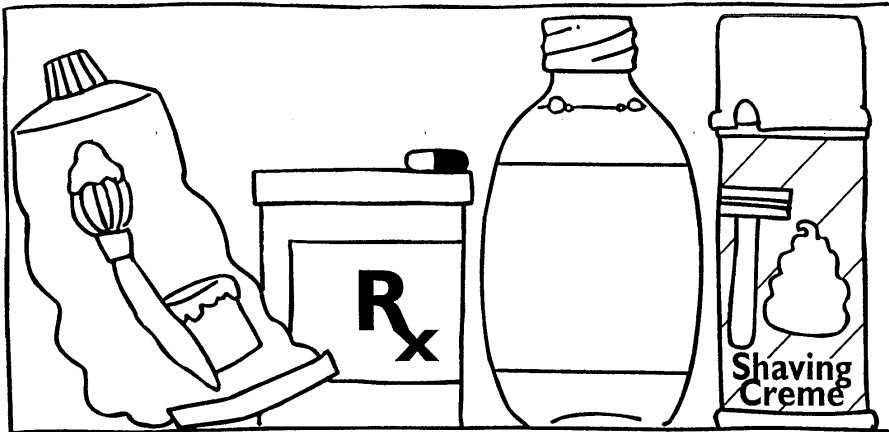

In the KITCHEN :

There are 6 products in this cupboard that can be poisonous. Circle them when you find them, then look in the mirror at the list Deidre is holding to see if you've found them all.

or in the BATHROOM : Help Chris and Max find the products that can be poisonous. Color all of them RED.

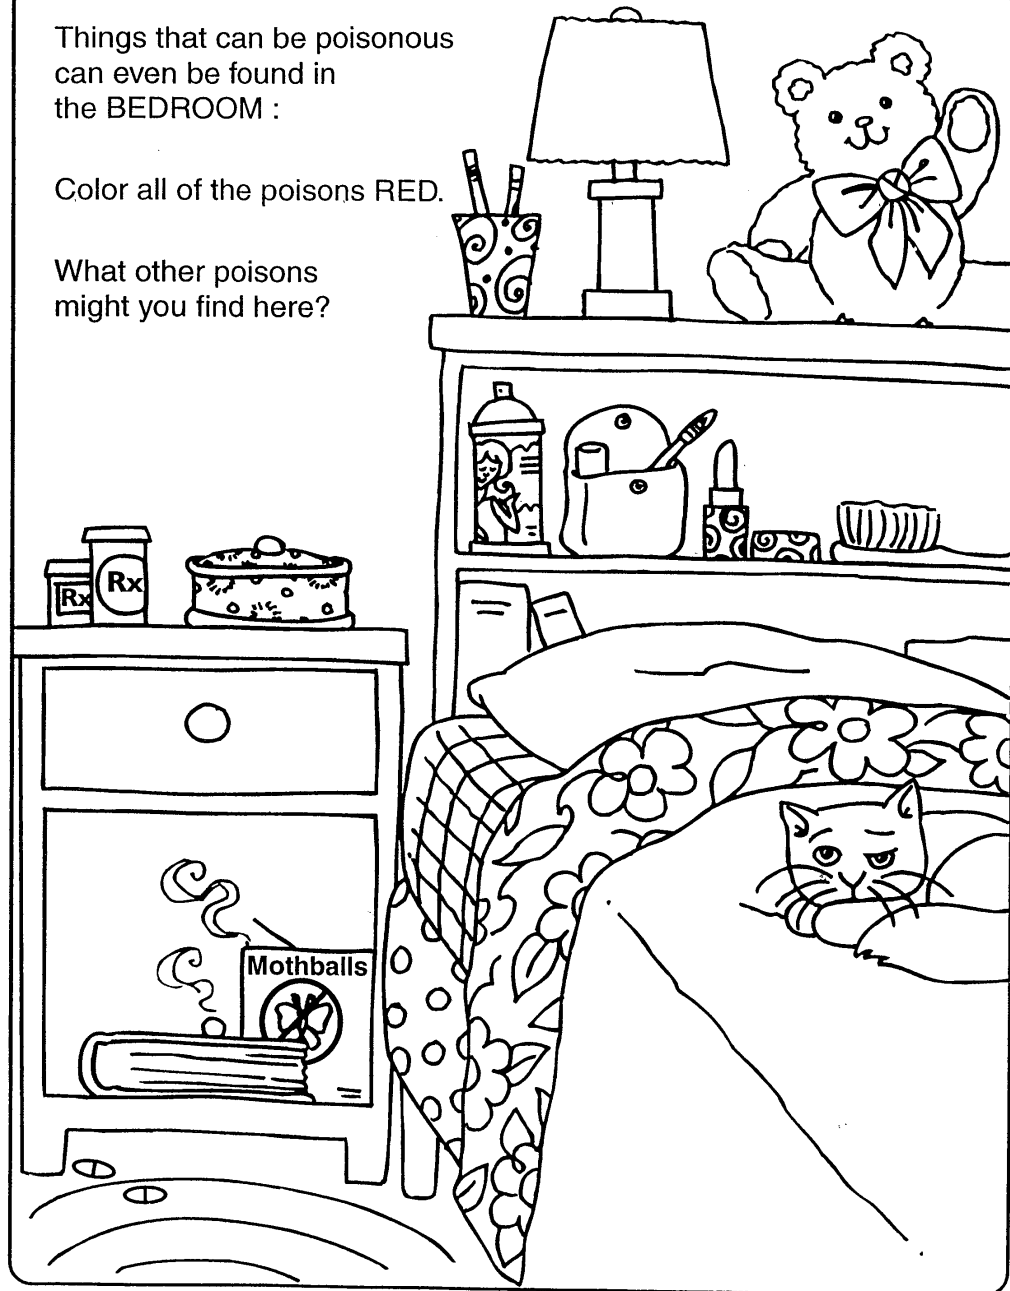

Look at both of the shelves. Can you find what is different on the bottom shelf?

Where are the poisons? Draw an "X" over them.

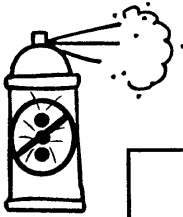

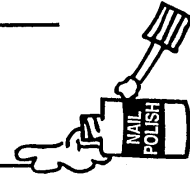

Things that can be poisonous
can even be found in
the BEDROOM :

Color all of the poisons RED.

What other poisons
might you find here?

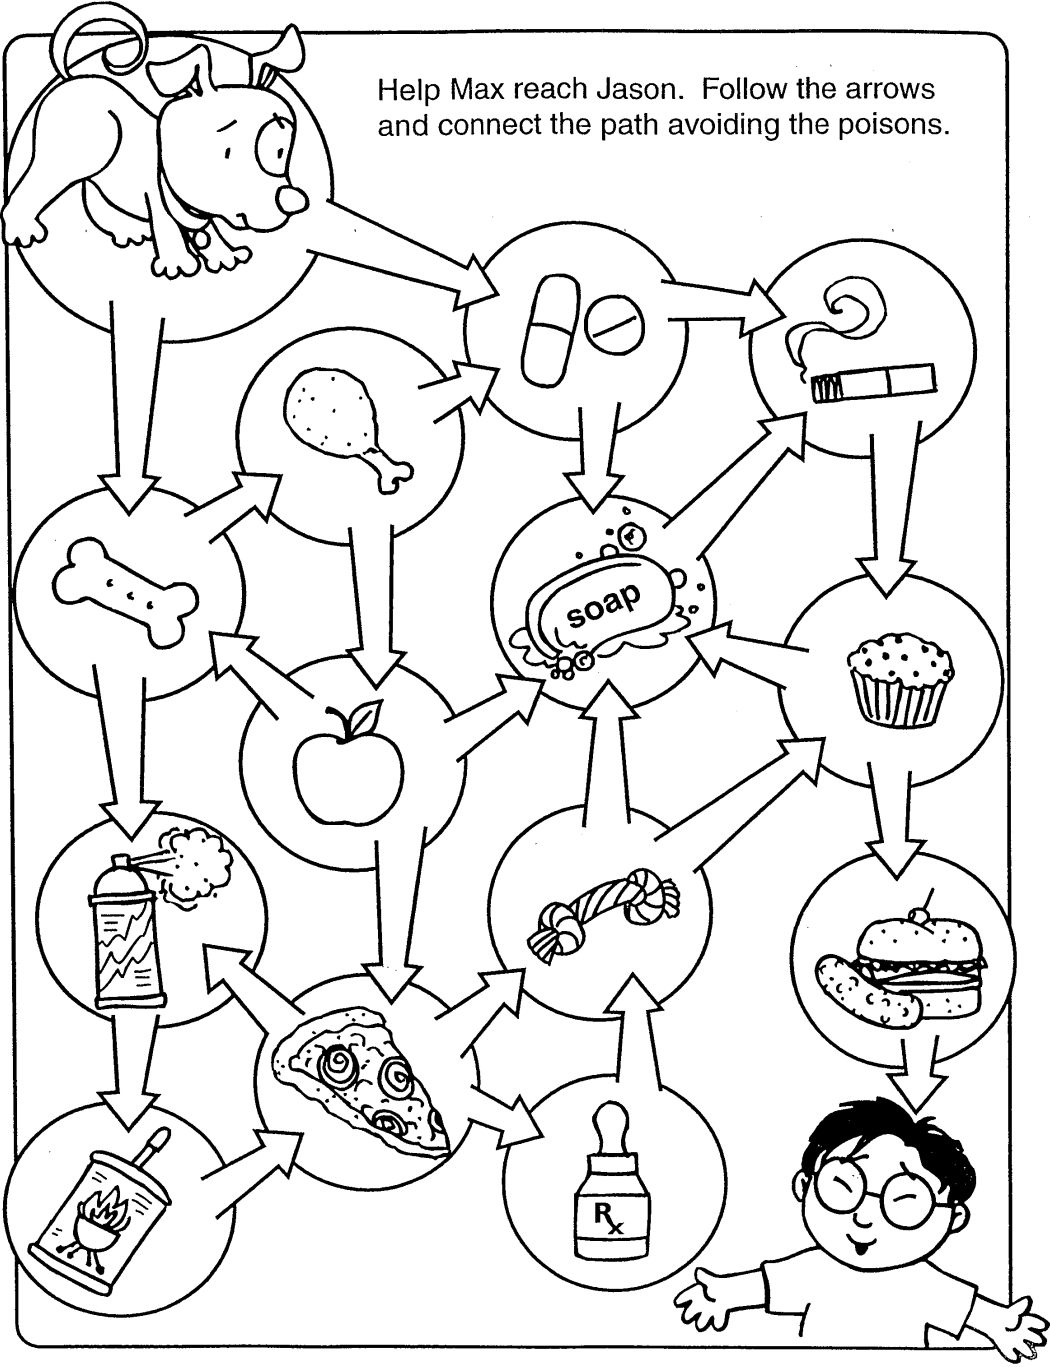

Help Jason find his way to Deidre, Chris, and Max.
Careful! Don't touch the poisons!

Deidre and Max are looking at the things in the BASEMENT that can be poisonous or dangerous. How many do you see?

Where would be a good place to put all of these poisonous things?

How many of each form of poison can you find in the GARAGE?
Write your answers in the boxes at the bottom of the page.

I'M MR. YUK
