

Who is the kit ideal for?

Ideal for educators, health educators, prevention/intervention specialists, healthcare providers, and more, the kit will orient you to the devices, uses, pro– and anti– arguments, and basic health research surrounding vaping and e-cigarettes. The purchase of this kit is great for community coalitions or schools concerned that their funding streams will not allow them to purchase these supplies themselves directly from vape shops or retail marijuana stores. Those educators without such restrictions can use this quote as list of suggested items to build their own such kit.

EXAMPLE DISPLAY KIT QUOTE

Purchase of the kit also includes*:

- A user guide that describes the items included and current research
- Real-time, technical assistance from one of our Health Education & Outreach Specialists at the Washington Poison Center
- Training Workshop** and Materials with the ability to add your logo
 - E-Cigarette and Vaping presentation slides
 - Youth and Vaping Flyer
 - Marijuana Flyer (still in the works)

*Those who have assembled their own kit still have access to these resources,

**The training of the trainers presentation will be made by one of our Health Education & Outreach Specialists. The training is designed for greatest impact in person, and we are willing and able to travel. However, should travel be required outside of the Puget Sound Corridor, you may be asked to help cover the cost of travel expenses.

For more information about the kit, to place an order, or schedule a training please contact one of our Health Education & Outreach Specialists at the Washington Poison Center: education@wapc.org / 206-517-2380 . For questions or concerns related to coalition use (logistics, reporting, purchasing, etc.) contact Liz Wilhelm of the Prevention WINS Coalition at liz.wilhelm@seattlechildrens.org
