

How To Collect Soil:

1. Identify area of interest.
2. Combine soil in clean container.
 - For large area collect soil from 5-10 random spots
 - For small area collect soil from 3 random spots
 - Garden area dig 6-8 inches deep
 - Play area dig 1-2 inches deep

1. Mix soil well.
2. Remove pebbles, rocks, and roots. Air dry in sun. Do not use flame, oven, or hair dryer.
3. Transfer 1-2 cups of mixed soil into a one-quart Ziploc bag (about half full). Label location on bag.

NOTE: For more than one sample repeat steps 1-5 and rinse container between samples.

Limit of three bags per person.
 Samples accepted until 1:30PM.
