Halloween is right around the corner! Follow our safety tips to ensure this spooky night doesn't become *too* scary with an unexpected poisoning.

- **Be careful with glow sticks.** The liquid in glow sticks is generally not toxic, but can cause irritation if swallowed or splashed into the eyes. NEVER put glow sticks in the microwave.
- Use dry ice safely:
 - Wear gloves and be careful when handling dry ice
 - Do not store dry ice in the freezer, and always use it in a well ventilated area
 - Swallowing or touching dry ice can cause significant burns and injury
- **Inspect all candy before eating** for signs of tampering or compromised packaging. This includes tears, broken seals, pinholes, or discoloration.
- Consume wisely. Alcohol does not mix well with anything, especially cannabis or prescription drugs. When consumed together, these substances can lead to severe health and safety issues.
- **Safely store cannabis (marijuana) edibles** away from all Halloween candy—out of sight, reach, and preferably locked up.
- During this season of respiratory illnesses:
 - Wear a protective mask (a cloth face covering or disposable mask that covers your mouth and nose) if you are giving out candy or going trick-or-treating.
 - o If you are celebrating with people outside of your household, wear a mask and celebrate outdoors when possible.
 - Use hand sanitizer after each interaction (giving OR receiving candy). Only adults should dispense hand sanitizer—do not let children apply hand sanitizer to themselves. Use a dime sized amount and ensure hands are rubbed together until dry.
- Do not use disinfectants or cleaning products on candy.

The Washington Poison Center is always here to help, 24/7/365. Call 1(800) 222-1222 for free, confidential, and expert poison information.
